

## SUMMARY

Generative AI Language Specialist, Italian Teacher for foreigners and entry-level Web Developer with 10 years of experience promoting a productive learning and work environment. Proficient in Java, JavaScript, and UX Design.

## LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript | React, Spring Boot | MySQL Workbench, Figma

## EXPERIENCE

### Language Specialist — Innodata

May 2024 - Present

- Create data sets for AI models that will help improve its accuracy, fluency, coherence and voice.
- Recognized for delivering top-quality results with the best overall performance scores within the team.
- Consistently achieve and exceed key performance indicators (KPIs), including daily job count, average handle time and production hours.
- Annotate data to ensure AI outputs align with human values and cultural nuances.
- Analyze and optimize grammar, syntax and sentence structure in both expert-generated and AI-generated content to maintain linguistic precision and consistency.
- Collaborate effectively with cross-functional teams to meet project goals and deadlines.
- Adapt seamlessly to dynamic environments, shifting guidelines, and evolving priorities.

### Italian Teacher — Self-employed

April 2020 - Present

- Develop and maintain a customized curriculum designed for students to attain proficiency in Italian.
- Prepare individualized learning plans based on individual needs and comprehension.
- Organize and schedule weekly lessons for 40+ individual students globally.
- Achieved 99% student satisfaction rating to date and an average rating of 4.9 out of 5 stars.

### RoomRanger — LaunchCode Capstone Project

- Web application built with a team that allows managers to assign cleaning tasks to specific staff members, track the progress of each task, and provide real-time updates on room status.
- Built a feature for managers to assign rooms and tasks to designated workers.
- Created manager dashboard where authorized users can view, edit, and search assigned rooms by room number, room attendant, and room status.
- Implemented a feature that enables users to translate text using an external API.
- Full Project Tech stack: Spring Boot, MySQL, React, Rapid Translator API.

### Little Lemon — Meta Front End Developer Capstone Project

- Designed and built a responsive web application that allows users to reserve a table for the Little Lemon restaurant.
- Utilized Figma for wire framing and design, ensuring a cohesive and visually appealing user interface.
- Integrated React components to create an interactive and dynamic user experience.
- Conducted user testing and feedback iteration to refine the app's usability and functionality.
- Full Project Tech stack: Figma, React.
